Course Description

The Robotics course introduces the world of robotics engineering, manufacturing and operations. Students learn design, controls, programming, and sensor (e.g., ultrasonic, touch, infrared) use. They learn engineering is designing to meet people's needs using engineering processes under time constraints and budgets mirroring industry practices. Their projects may include designing, building, and operating robots to help the law enforcement class clear a room searching for suspects, or programming humanoid robots. Humanoid robots have facial recognition, understand language, speak, and move autonomously. Projects may include teaching the robots to play soccer, dance, or aid humans needing conversation or assistance in the home.
