Overview

The Principles of Audio/Video Production course is designed to help students obtain the introductory skills of audio/video production through team and individual projects. Improve your knowledge and skills in communication, interpersonal interactions, and professional presentation. Principles of Audio/Video Production is the prerequisite course for the following courses at HCTC Audio Production and Video Production.

Pathway for Audio Production

Students following the Design and Multimedia Arts Program of Study for Audio Production will be prepared to plan, direct, and produce multimedia projects in audio and video production. Audio students will explore career opportunities and develop technical skills needed to work in the radio, TV, and film industries. Those that begin their academic pathway with Principles of Audio/Video Production may continue their studies in the following grade levels.

Eleventh grade – Digital Audio Tech 1 & 2 at HCTC

Twelfth grade – Practicum in Audio Production at HCTC

Pathway for Video Production

Students following the Design and Multimedia Arts Program of Study for Video Production will be prepared to plan, direct, and produce multimedia projects in audio and video production. Video students explore career opportunities and develop technical skills needed to work in the radio, TV, and film industries. Students that begin their academic pathway with Principles of Audio/Video Production may continue their studies in the following grade levels.

Eleventh grade – Video Production 1 and Lab at HCTC

Twelfth grade – Video Production 1 and Lab at HCTC

Program of Study Information

Additional information for the audio or video course details beyond the prerequisite course Principles of Audio/Video Production can be found in the individual course guides for each pathway.
