

Lake Pointe Elementary

TOP 10 THINGS

PARENTS NEED TO KNOW ABOUT

IN-PERSON LEARNING ON

SEPTEMBER 8

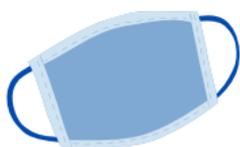

#10 CLASS SET-UP

We are working hard to facilitate social distancing in classrooms by moving out extra furniture and removing items that would be difficult to clean (rugs, etc.). Students will have portable partitions at their desks which can be moved with them to various parts of the room and school.

#9-"KISS AND DROP OFF"

Kiss and Drop Off is implemented from the first day of in person school. Parent will kiss, hug and wave goodbye to their children from the car or the school entrance. We are keeping our buildings as clean as possible and will have staff at every entrance to make sure all of our OWLS arrive safely to class.

#8- MASK ZONES

All staff and students wear face coverings in common areas in the building, in classrooms, and entering and exiting the building. Another way we are keeping everyone safe!

#7- MULTIPLE ENTRANCES

To minimize congestion, we have multiple doors open for students to enter the building, not just the front door. Dismissal will be staggered to help maintain social distancing.

#6-HANDS PLEASE!

Upon entering any door in the morning, our OWLS will be warmly greeted by a staff member and given a squirt of hand sanitizer.

#5- LET'S EAT!

Lunchtime is a great time for students to visit with each other and socialize. We have implemented social distancing at lunch by seating students farther apart at tables and distancing tables. This also means that parents are not able to have lunch with students at this time.

#4- RECESS PLEASE!

We know that being outside and socializing with friends is important, so we are maintaining all our recesses. Students will recess with their classmates under the supervision of their teacher and face coverings are not required when actively playing outside.

#3- KEEPING IT CLEAN

To keep our buildings as clean as possible, we are allowing no visitors at this time. If parents need to check out children early, they will come directly to the front office.

#2- TEACHERS ON THE MOVE!

Students will stay in their classroom with their "family" and teachers will come to them for rotations. This allows students to stay in their area and use their own supplies and helps keep everyone safe.

#1- OUR OWLS

We can't wait to see your children!

We have missed our OWLS so much!
